

FOAMALITE®

x-press

THE PREFERRED CHOICE OF PRINTERS.

PRODUCT

FOAMALITE® x-press is a light-weight and easy to use PVC foam sheet. Its white, smooth and uniform surfaces make it the material of choice for outstanding printing results. Thanks to its degree of whiteness, FOAMALITE® x-press ensures a very high fidelity of colours. FOAMALITE® x-press sheets feature blemish-free surfaces with a consistently regular roughness that have been specifically designed for impeccable adhesion of UV curing inks.

Thanks to the good dimensional stability, FOAMALITE® x-press is suited for flat applications.

It is supplied as standard with polyethylene masking film on one side. The masking film removes cleanly revealing a smooth surface finish with no glue residues.

PROTECTIVE FILM

- PE film on one side as standard
- Protective PE film on both sides on request

APPLICATIONS

- Digitally and screen printed panels
- Short- and mid-term advertising campaigns
- Signage
- Ideal lamination substrate
- Flat applications

FOAMALITE® x-press – AT A GLANCE

- Smooth white surface for excellent printing results
- “Ready to use”
- Optimal ink adhesion and colour fastness
- Good dimensional accuracy of the sheets
- Suitable for flat applications
- Fire behavior according to:
> DIN EN 13501-1: C - s3, d0 (2 - 10 mm)
- Wide range of sheet sizes and thicknesses, special formats available on request
