

FILMS

POLYESTER BACKLIT FILM

- 195 micron, white, satin or 210 micron, white, gloss film.
- PVC free, front print polyester film.
- High image quality with brilliant colour reproduction.
- Films are day and night compatible which means even with the back lights switched off the colours still stand out.
- Non-scratch front and back.
- Good cutting ability (no cutting dust).
- Very good temperature resistance.
- QM System ISO9001-2008 and REACH compliant.
- Suitable for use on solvent, eco-solvent, mild solvent and low solvent inks, UV curable and latex printers.

APPLICATIONS

Suitable for indoor and short term outdoor signage for example, illuminated displays, exhibition works, interior design applications, casino signage, reception areas, board rooms, airport applications, retail promotions, display units, show rooms, product launches, menu boards etc.

PVC-PET FILM

- 220 micron, white, satin film.
- Front print PVC, PET film.
- High image quality, edge sharpness and resolution.
- Best ink absorption.
- Lay flatness.
- Suitable for use on solvent, eco-solvent, mild solvent and low solvent inks, UV curable and latex printers.

APPLICATIONS

For indoor signage and roll-up banner stands.
