## SIGN MAKING TOOLS

### PAPER TRIMMERS

Paper trimmers designed to cut roll media with a straight edge.

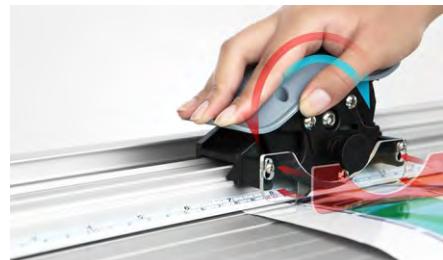

#### MANUAL PAPER TRIMMER MT02

- Portable, lightweight and easy to use.
- Adjustable cutting depth with a maximum of 12mm thick material.
- Include standard ruler marks and non-slip strips on bottom of unit.
- Available in length of 700mm, 1000mm and 1300mm
- Suitable for cutting of advertising and decorative materials, paper panels, self-adhesive vinyl etc.

#### MANUAL PAPER TRIMMER MT06

- Cutter and ruler in one with workbench wide enough to stabilize media.
- Linear guide rail fixed and leaded cutting blade (with protective cover) ensures accurate and improve cutting performance.
- Adjustable cutting depth with a maximum of 12mm thick material.
- Available in length of 700mm and 1300mm
- Suitable for cutting of PP, PVC films, advertising paper etc.

### UTILITY BACKING PAPER CUTTER

- Specially designed to cut through just the backing paper of vinyl and wallpaper.
- Easy to handle and Stainless steel, rust resistant cutter with a double side edge blade
- Suitable for use on vinyl, films and wallpaper.
- Blades are sold separately in packs of 10.

## NOTCHING CUTTER NC01

- Ideal accessory to use when a uniform gap (V-groove) is required to bend material.
- Small and easy to use handheld unit.
- Suitable for use on foam board up to 5mm thickness.
- Grooving angle of 90° and 120°.
- Provides a fixed and accurate angle when cutting.
- Mainly for advertising displays, D.I.Y model making, triangle signage plates, cubes, pillar cladding, aircraft/car-building models etc.
